Contract awarding procedure: Enquiry for Quotation

Object of the Contract: Manufacturing, mounting and starting-up a Production Line for producing the RDF fuel from automotive tyres and for cleaning and briquetting the steel cord from recycling the tyres in the plant of the ordering party in Sławno near Opoczno.

The line should fulfil the following technical requirements:

- production of RDF fuel from passenger cars and trucks;
- the final product, namely RDF that is. Chips size 20-30 mm x 20-30 mm
- Efficiency of the RDF fuel production – 8 tons/hour of the inlet material
- Cleaning and briquetting of the steel cord from the recycling the tyres - capacity 1.2 T/hour of the inlet material
- max. Length of the steel cord after cleaning – max. 30 cm
- briquette size – from 80mm up to 160mm
- Briquette height – from 120 mm up to 180 mm

- Density of the briquette cord – 3.2 – 3.5 kg/cm²

The target of the project is to introduce a technology that reinforces the natural environment that is processing the used tyres that are not suitable for the mechanical recycling into RDF fuel, what will contribute to reducing the negative impact on the natural environment.

Cleaning and briqueting of the steel cord from the tyres, obtained as the result of the mechanical recycling, contributing to the reduction of the distribution time, by the ability to deliver to the final recipient.

The ordering party reserves the right, in justified cases, at every point before the deadline for the accepting the offers, to modify and supplement the content of the specification and important order conditions. The information about the change will be presented on the company web page and it will be sent by e-mail, fax and a registered letter to all Suppliers and Contractors, who have received earlier the specification of the important contract conditions.

Variant offers: The ordering party does not accept any variant offers.

The order deadline:

Delivery of the technological line including the start-up – up to the : 30.11.2015 - 10.01.2016
